4. GENERAL INFORMATION

4.1 Description of EUT

PRODUCT NAME	RVT101HVLNWC00-B
TEST VOLTAGE	Battery 12V

Note. All test was performed on RVT101HVLNWC00-B. But results applied for every module within this line: RVT101HVLNWC00, RVT101HVLNWCA0, RVT101HVLFWCA0, RVT101HVLNWC00-B.

4.2 Description of EUT peripheral

The 101BT817 (display controller board) and Revelation Board (host controller board) designed by Riverdi were used to drive RVT101HVLNWC00-B during the EMI test.

101BT817, as the main board of Riverdi EVE4 IPS 10.1" series, applies Bridgetek's BT817Q chip, which is the most powerful and intelligent graphics controller.

It features a low EMI design, QSPI/SPI interface, RiBUS connector, built-in flash memory, and audio amplifier.

Learn more about EVE4 solutions here or browse the EVE4 IPS 10.1" series directly here.

The following EUT operation modes were tested:

Mode A:

The 101BT817 was assembled with RVT101HVLNWC00-B and connected with the Revelation Board via RiBUS.

During the test, the Revelation Board keeps transferring data to 101BT817 via RiBUS with full SPI speed at 6 MHz.

Animated pictures were presented on the screen.

Mode B:

The images were generated by the Revelation Board.

During the test, the Revelation Board was disconnected to eliminate the radiated emission from it.

The RVT101HVLNWC00-B connected with 101BT817 was powered via RiBUS, and a non-animated picture was presented from the internal BT817Q memory.

7. Summary

The test results confirmed the low electromagnetic emissions of Riverdi HB, IPS 10.1” displays, even when displaying dynamic pictures.

Riverdi HB, IPS 10.1” displays have undergone EMI compliance self-tests and performed well at specified EMI limits.

In consequence, Riverdi HB, IPS 10.1” displays will not impact the environment due to the very low emission levels measured.
